3. Making Connection

Connect Ethernet cable to make a connection to the POE HUB.
The camera support POE only.

4. Assign IP address

The default setting of the camera is set to "DHCP" and "UPnP" function is set to ON. If you have a DHCP server on your network and UPnP function is enabled on your PC you can find the network camera in "My network".

If a DHCP server is not available on your network, please assign IP address by the following process.

Execute PixelPro_Discovery_Tool.exe. It will search cameras on the network automatically.

1) After the camera is listed in camera list, select the camera.
2) Type in the all network information.
3) Click "Apply" button

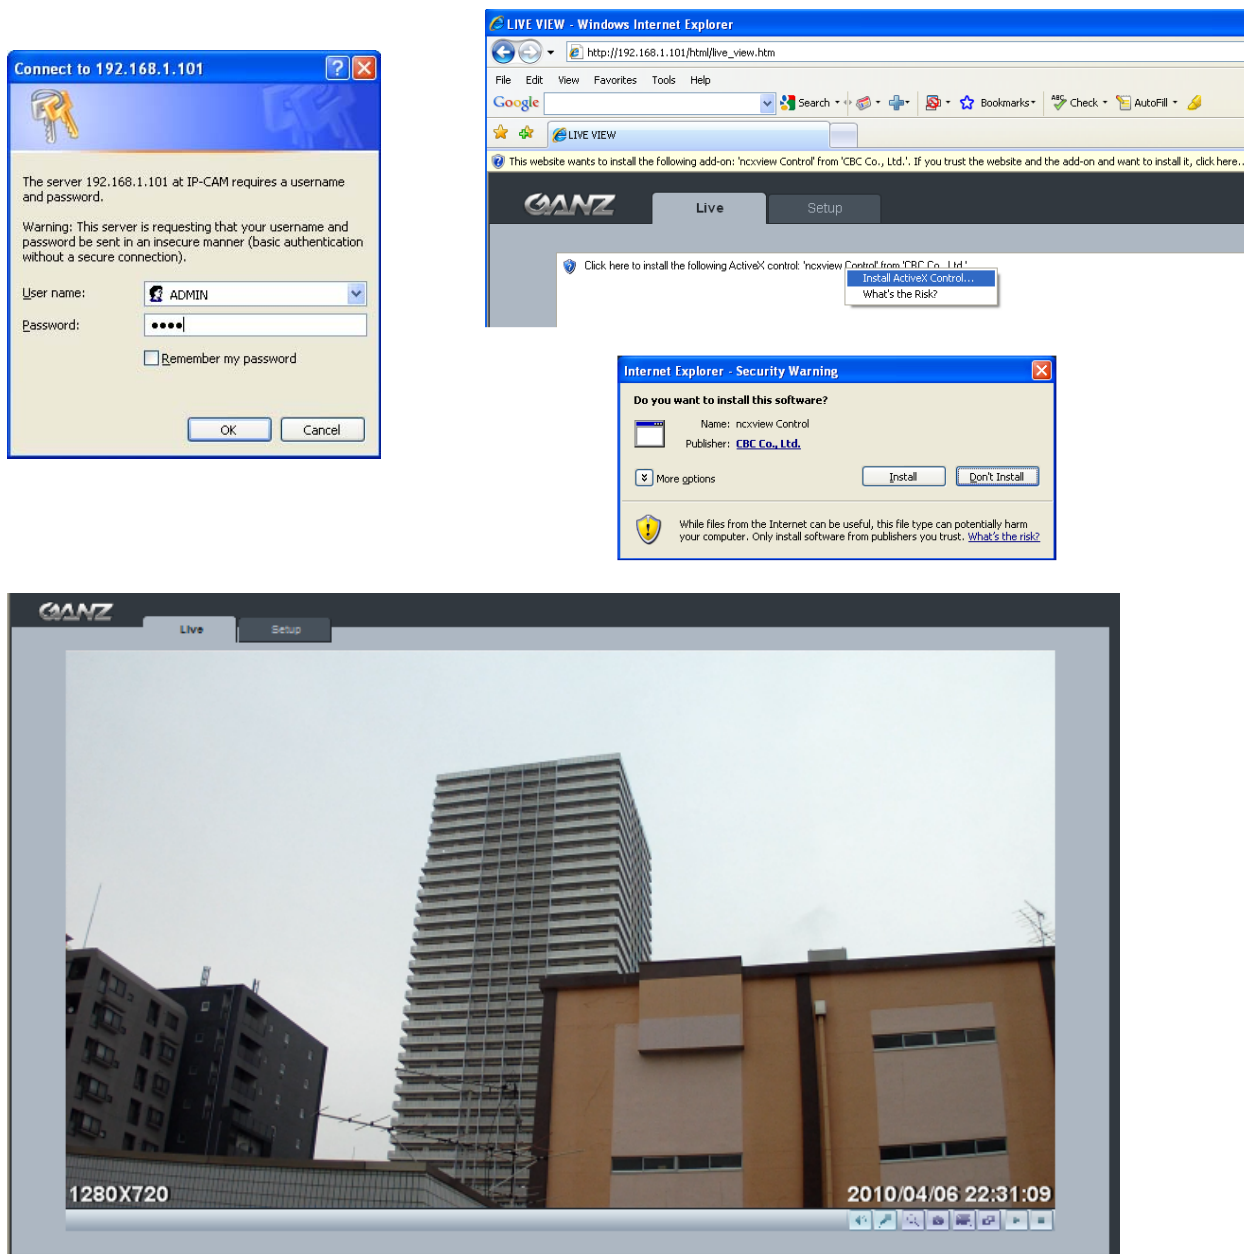

Then double click the camera in the list, Internet explorer will open automatically.

5. Web browser connection

> Note : The Network camera supports Internet Explorer 7 or above.
> Please check version of your browser and update it if necessary.

> When you first access the camera you need to download and install an
> Active X control from the camera to display a Live View image.

> Default User and Password are set to "ADMIN" and "1234". Please type in
> the user ID and password to connect the network camera.

> Note: By Default the cameras come with "Installation Mode" set to "ON" to
> enable Analog output. You must turn installation mode off to use 720p
> or 1080p streaming.

For further information for setup, please refer to User's manual in software CD.
